37. Fleeting sheave
38. Dual backstay pendants
39. Dual luffing boom pendants
40. Luffing jib hoist rope
41. Luffing boom cap
42. Midfall extension
43. 63,400 lb. (28,758 kg) upper counterweight
44. 25,000 lb. (11,340 kg) bumper counterweight
45. Luffing boom extensions
46. Luffing jib live mast bridles
47. Balance arm bail
48. Luffing jib backstop strut
49. Tensiometer (2)
50. 10,000 lb. (4,536 kg) auxiliary bumper ctw.
51. Luffing boom length
General Specifications

- **Luffing Boom**
  Tubular; 80" (2.03 m) wide, 68" (1.72 m) deep at connections. Alloy steel round tubular chords 4.0 (.10 m) outside diameter.

- **Luffing Boom Base Section**
  20' (6.09 m) long. Luffing boom feet on 55" (1.39 m) centers. Hydraulic powered luffing boom foot pin removal system standard.

- **Luffing Boom Extensions**
  Available in 10' (3.04 m), 20' (6.08 m), 30' (9.14 m) and 40' (12.19 m) lengths with appropriate length pendants.

- **Luffing Boom Connections**
  In-line pin connections.

- **Luffing Boom Cap**
  4' 0" (1.21 m) long; tubular construction, pin connected to the top luffing boom extension.

- **Balance Arm**
  Provides an offset luffing jib connection to allow for a full 165° of luffing jib angle variation from erection to minimum radius operating position. Transfers the resultant of the luffing jib foot thrust to the luffing boom centerline so that all four chords are loaded equally. Tubular construction, front chords span 6' 0" (1.82 m) from luffing boom centerline and rear chords span 30' 0" (9.14 m) from luffing boom centerline to the luffing jib hoist ball shaft.

- **Luffing Boom Stops**
  Dual lever type, spring cushioned. Adjustable levers pin to luffing boom base section; backstops anchor to the upper revolving frame. Required for all luffing boom lengths.

- **Luffing Boom Hoist Bridle**
  The 16 part conventional boom hoist becomes the luffing boom hoist with no re-reewing required.

- **Luffing Boom Live Mast**
  Welded plate/tube construction 30' 0" (9.14 m) long, required for all luffing boom/luffing jib lengths; supports luffing jib hoist bridge. (Same live mast as on standard crane.)

- **Balance Arm Stops**
  Spring canisters with links that position the balance arm centerline approximately perpendicular to the luffing boom.

- **Wire Rope**
  See chart on page 4.

- **Basic Luffing Boom**
  80' (24.38 m) long; contains one 20' 0" (6.09 m) base section, one 10' 0" (3.04 m), one 40' 0" (12.19 m) extension, 4' 0" (1.21 m) tapered luffing boom cap and 6' 0" (1.82 m) balance arm. (Includes live mast, 10-part bridle and ball machinery, spreader bar and luffing jib backstop system.

- **Maximum Luffing Boom**
  No assist luffing boom erection; 180' (54.9 m) luffing boom for use with maximum 160' (48.76 m) luffing jib and 30' (9.14 m) fixed jib.

- **Luffing Jib - 218A/218H Conventional Boom**
  Tubular; basic luffing jib 80' (24.38 m) long, 60" (1.52 m) wide, 50" (1.27 m) deep at connections. Alloy steel round tubular chords 3.0" (0.07 m) outside diameter.

- **Luffing Jib Base Section**
  10' 0" (3.04 m) long, 80" (2.03 m) wide at luffing jib foot. 50" (1.27 m) deep and 60" (1.52 m) wide at pin connections.

- **Luffing Jib Extensions - .220" (.55 mm) Wall**
  Available in 10' (3.04 m), 20' (6.10 m), 30' (9.14 m) and 40' (12.19 m) lengths with appropriate length pendants. (218A/218H extensions)

- **Luffing Jib Extensions - .259" Wall**
  Available in 20' (6.10 m) and 30' (9.14 m) lengths with appropriate length pendants. (218A/218H extensions)

- **Luffing Jib Connections**
  In-line pin connections.

- **Top Section - Luffing Jib**
  Open throat, 20' (6.09 m) long. (218A/218H top section)

- **Luffing Jib Live Mast**
  30' (9.14 m) long, required for all luffing jib/fixed jib lengths.

- **Luffing Jib Point Machinery**
  Five 21" (.53 m) root diameter sheaves. Sheaves mounted on anti-friction bearings.

- **Deflector Rollers**
  Deflect load hoist wire rope off luffing boom/luffing jib. Steel rollers mounted on anti-friction pillow block bearings.

- **Luffing Jib Backstop System**
  3/4" (19 mm) wire rope type "N" pendants. Contains spring canisters and a limit switch to prevent luffing jib from exceeding maximum operating angle.

- **Luffing Jib Hoist**
  1" (25 mm) type "N" luffing jib hoist line runs from the rear drum to the balance arm ball. Ten part reeving hoists luffing jib from -75° to 0° during erection and from 0° to 75° during operation.

- **Luffing Jib Hoist Limiting Device**
  One of the luffing jib backstop canisters is equipped with a luffing jib hoist limit switch used to avoid hoisting above minimum radius. Brakes apply automatically.

- **Drum Rotation Indicators**
  Standard for front drum (load hoist) and rear drum (luffing jib hoist).

- **Luffing Jib Lengths**
  Luffing jib lengths from 80' (24.38 m) to 160' (48.77 m) may be used on all luffing boom lengths from 80' (24.38 m) to 180' (54.86 m) with luffing boom angles at 87°, 85°, 80°, 75° and 70° angles.

- **Luffing Jib Nose Wheels**
  Pin-connected to end of luffing jib top section; support luffing jib peak on ground during luffing boom and luffing jib erection.

- **Luffing Boom And Luffing Jib Angle Indicators**
  Electronic type standard. Read out unit conveniently located in crane operator's cab.

- **Capacities**
  Available for luffing boom angles of 87°, 85°, 80°, 75°, and 70°.

- **Fixed Jib**
  Tubular; basic two-piece 30' (9.14 m) long; 32" (81 m) wide; 24" (.51 m) deep at connections. Alloy steel round tubular chords 2-1/4" (57 mm) outside diameter. (Same jib as used on conventional 248H boom.)

- **Base Section - Fixed Jib**
  15' 0" (4.57 m) long.

- **Jib Connections**
General Specifications (con’t)

- Line pin connections.

**Tip section - Fixed Jib**

15' 0" (4.57 m) long; equipped with single 21" (5.33 m) root diameter sheave, blunted on anti-friction bearings.

**Jib Adapter**

Connects to the fixed jib lower section and the luffing jib upper section. Allows the fixed jib to pivot 90° to the luffing jib for erection purposes.

**Jib Mast**

17' 10" (5.43 m) long. Single jib load hoist rope (whipline) deflector sheave, 21" (5.33 m) root diameter, mounted on anti-friction bearings. Two stayline equalizer sheaves blunted at end of mast.

**Fixed Jib Stops**

- Rope type; pin to fixed jib peak and to axle of luffing jib nose wheel.

**Jib Staylines**

Front and back staylines attach jib head shaft and luffing jib tip section to the jib mast respectively. Connections at the jib mast employ equalizing sheaves for both stays.

**Fixed Jib Lengths And Offset Angles**

- 30' (9.14 m) only; 5° offset only.

**Fixed Jib Nose Wheel**

Pin connected to jib peak; supports jib on ground during luffing boom/luffing jib/fixed jib erection.

3rd Drum Winch

Optional; used in conjunction with 30' (9.14 m) fixed jib as a whipline function. Bolts in the luffing boom base section, 8' 0" (2.44 m) from the luffing boom foot pin. The winch drive consists of a variable displacement bent axis piston motor with an integral multi-disk brake and planetary. This drum is grooved for 1" (25.4 mm) rope.

Hydraulic power to the winch is supplied by a separate pump.

Quick disconnects at the outside of the machinery house allow the winch to be transported in the luffing boom lower section.

The hydraulic circuit contains a holding valve, which when coupled with the winch multi-disk brake will prevent load droop when initiating a hoist function. A ratchet-pawl system is not available.

---

### Jobsite Travel

(without load)

The HC-248H with luffing attachment may be moved on the jobsite with all combinations of luffing boom, luffing jib, and fixed jib. This can be done with the upper facing either over the front or rear of the carrier.

See page 6 for over front configuration
Jobsite Travel (without load) con’t

The HC-248H with luffing attachment may be moved on the jobsite with all combinations of luffing boom, luffing jib, and fixed jib. This can be done with the upper facing either over the front or rear of the carrier.

See page 5 for over rear configuration.
