Upperstructure

■ Boom

Link-Belt patented design. 28' 9"—70' 3" (8.76 m — 21.41 m) three-section boom with two power sections. Boom side plates have diamond shaped impressions for superior strength to weight ratio and are offset welded to carefully machined 100,000 p.s.i. (689.5 MPa) steel angle chords for maximum integrity and strength. Boom telescope sections are supported by wear shoes both vertically and horizontally. Anti-two block device, electronic boom length/angle indicator and function kickout.

Load Moment Indicator — Optional; Audio-visual warning system with anti-two block and function kickouts. Constant display of boom length and angle, tip height, radius of load, machine configuration, allowed load, actual load and % of allowed load. Presettable alarms for maximum and minimum boom angles, maximum tip height and maximum boom length.

Boom head — Standard; three 10-5/8" (0.27 m) root diameter head sheaves with four 10-5/8" (0.27 m) root diameter head sheaves available to handle up to 8 parts of 9-16" (14 mm) wire rope. Two removable wire rope guards and rope dead end lugs are provided on each side of the boom head. Optional; 12 5/8" (.32 m) root diameter head sheaves, meets 23:1 ratio European safety code with 9-16" (14 mm) wire rope.

Auxiliary lifting sheave — Optional; Single 10-5/8" (0.27 m) root diameter head sheave with removable wire rope guards, mounted to boom. For use with one or two parts of line off the optional auxiliary winch. Does not affect erection of jib or use of main head sheaves for multiple reeving.

Boom elevation — One Link-Belt designed hydraulic boom hoist cylinder with integral holding valve. Hand or optional foot controls for boom elevation from -3° to 80°.

■ Fly

Optional — 24' 0" (7.32 m) stowable lattice type.

■ Cab and Controls

Environmental cab; isolated from sound and vibration by rubber mounts. All tinted and tempered safety glass windows. For maximum visibility and ventilation, sliding right side and rear windows and swing up roof window supported with two gas cylinders. Slide-by-door opens to 3' 0" (0.91 m) width. Six-way adjustable operator's seat, control levers for swing, boom telescope, winch and boom hoist, with optional foot controls for boom hoist and swing brake. Outrigger controls, sight level bubble.

Cab instrumentation — Dash mounted gauges for hydraulic oil temperature, fuel, water temperature and oil pressure.

■ Swing

Bi-directional hydraulic swing motor mounted to a planetary reducer for 360° continuous smooth swing at 3.0 r.p.m.

Swing parking brake — Mechanically applied and released, disc brake mounted on the speed reducer.

Swing brake — Optional; Foot operated, spring released, disc brake mounted on the speed reducer.

Swing lock — Standard; 360° position pin-type controlled from the operator's cab. Two position house lock for travel and pick and carry modes.

Counterweight — Bolted to upperstructure frame.

■ Hydraulic System

Main pump — Three-section gear-type pump. Combined pump capacity of 133 gpm (503.4 lpm). Powered by carrier engine through mechanical pump disconnect. Pump disconnect is a jaw-type clutch engaged/disengaged from carrier cab. Pump operates at 2,900 p.s.i. (200 Bars). Hydraulic oil cooler is standard.

Reservoir — Link-Belt, 110 gallon (416 l) capacity. Diffusers for deaeration.

Filtration — One six-micron filter located inside the hydraulic reservoir.

Control valves — Five separate control valves allow simultaneous operation of all crane functions.

■ Load Hoist System

Standard — Model 1M main winch with single-speed motor and automatic brake; power up/power down mode of operation. Bi-directional gear type hydraulic motor.

Optional — Model 2M main winch with two-speed motor and automatic brake; power up/power down mode of operation. Bi-directional, gear-type hydraulic motor.

Optional — Model 1M auxiliary winch with single-speed motor and automatic brake; power up/power down mode of operation. Bi-directional gear type hydraulic motor.

Line pulls and speeds — Maximum line pull is 9,900 lbs. (4491 kgs.) and maximum line speed is 418 f.p.m. (126.80 m/min) on 12" (0.30 m) root diameter smooth drum.

■ Additional Upperstructure Equipment — Optional

Boom hoist foot control, swing brake foot control, drum rotation indicators, two-speed main winch, propane heater, diesel heater, 25-ton (22.68 metric ton) hook block, 8-1/2 ton (7.72 metric ton) ball and swivel, roof window windshield wiper, flood lights, lifting lug package, hand throttle, air conditioning, windshield washer, amber rotating beacon, cab mounted spotlight, tachometer and engine monitoring system.
Carrier

- Type
  Link-Belt 8' 0" (2.44 m) wide, 216" (5.49 m) wheelbase.
  Standard — 6 x 4 drive
  Optional — 6 x 6 drive

- Frame — All-welded high strength alloy steel plate construction with box-type design and integral 100,000 p.s.i. (689.5 MPa) steel outrigger boxes.

- Outriggers
  Standard — Power hydraulic, double box, single beam outriggers, front and rear. Vertical jack cylinders, each equipped with integral holding valve. Beams extend to 18' 0" (5.49 m) centerline-to-centerline and retract to within 8' 0" (2.44 m) overall width. Equipped with stowable, 19" (48 m) square lightweight floats. Controls and sight level bubble located in upperstructure cab.
  Front bumper outrigger — Standard: Front center vertical jack mounted under bumper with 19" (48 m) square lightweight float. Provides 360° lifting capacities.

- Axles
  Front — Standard: Single axle, 81" (2.06 m) track
  Optional: Single drive axle, 79.75" (2.03 m) track
  Rear — Tandem axle, 71.77" (1.82 m) track. 6.14 to 1 ratio with interaxle differential

- Suspension
  Front — Spring suspension
  Rear — Solid mount 50" (1.27 m) bogie beam

- Wheels
  Front — Cast six spoke
  Rear — Cast six spoke

- Tires
  Standard Front — 15.0 x 22.5 (16 PR) transport type tubeless.
  Standard Rear — 10.0 x 20.0 (12 PR) transport type with tube.
  Optional Front — 16.5 x 22.5 (16-PR) transport type tubeless.
  Optional Rear — 10.0 x 20.0 (12 PR) or 11.0 x 20.0 (12-PR) lug type.
  Optional Front — 425/65R22.5 XZY lug type radials.
  Optional Rear — 11R20 XZA transport type radials.
  Optional Rear — 11R20 XZY lug type radials

- Brakes
  Full air on all wheels. Air dryer is standard.

- Service
  Front — Standard: 6 x 4 Cam-type 16-1/2" x 6" (.42 m x .15 m) shoe diameter.
  Front — Optional: 6 x 6.15" x 5" (.38 m x .13 m) shoe diameter.
  Rear — Cam-type 16-1/2" x 7" (.42 m x .18 m) shoe diameter

- Parking & emergency — One spring set, air released chamber per rear axle end. Parking brake applied with valve mounted on carrier dash. Emergency brakes apply automatically when air pressure drops below 40 p.s.i. (2.76 Bars) in both systems.

- Steering
  Sheppard steering, rack-and-pinion design. Provides wall-to-wall turning radius of 50' 7" (15.42 m).
  Optional: Remote steering control system. Operated from upperstructure cab. Instrumentation includes: toggle switch steering control, wheel position indicator, brake and transmission controls and parking brake control.
  Clutch — Lipe-Rollway 14" (0.36 m) diameter, spring loaded, single plate dry disc.
  Universals — Rockwell or Spicer; easy service type.

- Transmission
  Standard — Fuller Roadranger RT-6613; 13 speeds forward, 3 reverse.
  Optional — Allison MT-653DR; 5-speed automatic with lock-up converter.

- Electrical System
  One 12-volt battery. 1,115 cold cranking amps available, 80 amp alternator.
  Lights — Four dual-beam sealed headlights, front and rear directional signals, stop and tail lights, four-way emergency flashers, back-up lights, front, rear and side clearance lights with integral reflectors and license plate light.

- Carrier Cab
  One-man cab. Acoustical insulation with vinyl covering. Equipped with electric windshield wiper and washer, horn, four-way adjustable seat with seat belt, dome and dash lights, cigar lighter, am/fm-stereo, 22,400 BTU capacity heater, defroster, door and window locks, fire extinguisher, LH/RH rear view mirrors, tilt/telescoping steering wheel and sliding LH/RH and rear tinted windows.
  Cab instrumentation — Standard; illuminated instrument panel with speedometer, odometer, tachometer, voltmeter, hourmeter, front and rear air pressure gauges, low air pressure light and warning buzzer, automotive-type ignition (common with upper), engine oil pressure gauge, water temperature gauge, fuel gauge, turn signal indicator, high beam light switch, adjustable defroster vents, and circuit breakers.

- Additional Equipment — Standard
  Front and rear fenders, air dryer, back-up warning alarm, cab steps, access ladder to rear carrier deck with hand grab rails, front/rear low loops, skid-resistant finish on carrier deck and mud flaps

- Additional Equipment — Optional
  Engine block heater, ether injection starting package, spare tire and rim assemblies, towing shackles and engine monitoring system.

Axle Loads

Base machine includes 28' 9" - 70' 3" (8.76-21.41 m) 3-section boom, 365 (117.35 m) of 7/16" (11 mm) wire rope, single-speed main winch, 6x4 carrier with GM 8.2T diesel engine, full fuel, front bumper outrigger, 15x22.5 front tires, 10x20 high way rear tires, full hydraulic oil, pontoon's stored, 4,850 lb. (200 kg) counterweight and Roadranger transmission.
